

DATIM Release 1.32.ad was deployed on June 28, 2022.

DATIM 1.32.ad Includes data changes and Digital Health Inventory (DHI) app update

Update:

- **Data update:**

- Data change request for West Africa Region (Sierra Leone): Removed duplicated FY21 Q1 data that were entered by error under mechanism 85158. These data were all listed under data elements (HTS_INDEX, HTS_TST, PMTCT_STAT, SB_STAT, TX_NEW)

- **DHI App update:**

- The DHI app has been updated to 1.1.0. The updates include the following functionalities/features:
 - Added functionality for Agency users to group/link similar digital investments
 - Supporting investment data filtering options and pagination on the data table
 - Added ability to download raw investments data for submitted investments
-
-
